

→ Tradition and a passion to innovate -
in the 3rd generation

We set standards ... even higher

Innovative ability and personal contact have been among Lankwitzer's success factors for over 60 years – together with premium quality and technical expertise. As long ago as 1952, these were the attributes that quickly made this new company a highly-valued manufacturer of industrial paints. Today, Lankwitzer is among the international leading suppliers of coating systems in the industrial paint sector. Just as in our earliest days, our over 320 employees in more than 15 countries work with passion on our innovative products... and it's still the combination of our technical expertise and personal contact that make this family enterprise, now being managed in the third generation, such a special company.

Our recipe for success

A quarter of the company's employees are involved in research and development, resulting in continual new product developments and innovations. Thanks to our close contacts with customers and suppliers, we can improve and newly create certified and licensed coating systems,

flexibly and exactly in line with requirements. Our short paths and good interaction between customers, partners and staff ensure an unbureaucratic approach and outstanding customer satisfaction... and these are just some of the reasons why this German family enterprise is regarded as a reliable partner and a premium supplier of high-quality coating systems.

What makes Lankwitzer special

Innovative strength and experience:

- qualified staff for high-quality products "Made in Germany and China"

Consultancy, development and production from a single source:

- product development in line with customer requirements all the way to serial-production readiness

Speed and flexibility:

- short paths and unbureaucratic solutions

Durability and reliability:

- highly robust and durable products lead to cost effectiveness

→ From start to finish: service and quality

At your side ... with advice and support

Reliable processing, high-quality products and close collaboration with customers and suppliers – just some of the factors that over the last 30 years have made us an internationally successful manufacturer of premium coatings in the railway vehicles sector. Besides the great precision of our products in terms of processing and colour accuracy, our customers really appreciate our consulting expertise and our focus on solutions. This is because we work all over the world and we can supply application specialists, rapid service and effective support on site.

Precisely what you need

Vehicle interiors, exteriors or underframes – we supply you with exactly the right coating systems for railway vehicles. In addition to our tried-and-tested solvent-based paint systems we also offer water-based paint systems that feature a high resistance to the formation of bubbles. In order to ensure the best results for all applications, we focus strongly on individual adjustment

of the products to the customer's processing methods. After all, not only do we set exacting standards for the functionality of our products ... we want our coating systems to look great as well.

What makes Lankwitzer a specialist in the railway vehicle sector

Outstanding competence in coatings:

- excellent processing reliability, ease of processing and weather resistance
- water-based paint systems with a high resistance to the formation of bubbles
- durable gloss retention and high graffiti resistance

A reliable and experienced partner at your side:

- support with coating processes on site, sophisticated logistics and just-in-time delivery possible
- service portfolio ranging from advice and consultancy through design development and all the way to series-production readiness
- various certifications in the railway vehicle sector as well as fire safety certifications (examination by independent institutes)

01 CUSTOMER-ORIENTED SOLUTIONS

**We know what your product can do ...
and so we adjust our products to match.**

02 TRUE PARTNERSHIP

Open collaboration with partners and customers is our priority ... in both good times and bad.

→ INTERIOR

- highest resistance to graffiti and cleaning agents
- highly scratch-resistant
- high colour accuracy
- available as hydro and solvent coatings
- fire safety certification
- meets requirements in line with DB TL 918300, page 38 Deutsche Bahn (draft)

Texture coating

Smooth coating

Micro-texture coating

03 UNCOMPLICATED WORKING APPROACH

**If you want good and rapid solutions
there's only one path to take ...
the short and unbureaucratic one.**

→ UNDERFRAME

- **high impact resistance and elasticity**
- **available as hydro and solvent coatings**
- **certification e.g. in line with DB TL 918300, pages 40 and 42**

EP thick-film coating

04 RELIABLE QUALITY

The durability of our products is more than just a promise ... after 30 years it is solid experience.

→ EXTERIOR

- good flow, good processability
- high gloss retention
- highest resistance to graffiti and cleaning agents
- available as hydro and solvent coatings
- worldwide certification, e.g. in line with DB, Gost and other rail standards

Solid coating

Glitter coating

Clear coating

05
HIGH-QUALITY
APPEARANCE

We emphasize the quality of our products ... from precise colour tones to glossy surfaces.

→ SPECIAL EXTERIOR

- **product innovation**
- **good flow, good processability**
- **high gloss retention and washing-brush resistance (Amtec Kistler)**
- **highest resistance to graffiti and cleaning agents**
- **available as hydro and solvent coatings**

4-5 layer structure with
Reflow clear coating

06
STATE-OF-THE-ART
DEVELOPMENTS

For us, innovation is a tradition ...
going back three generations.

→ COOLING PAINTS

- reduces coating warming and thus energy costs
- reduces the overheating risk for roof-mounted air-conditioning units
- extends maintenance cycles thanks to high durability
- good chalking and colour stability
- available as hydro and solvent coating

Thermo-reflex coating

07
RELIABLE
SERVICE

**If you have any questions then
we're at your service ...
on-site if necessary.**
